

## CEIAG/IT resources for students/parents

### Careers Resources

Our careers library houses a good stock of current university prospectuses and employer information as well as books and magazines on a wide selection of careers and higher education courses. A comprehensive range of leaflets providing information about different careers detailing the type of work involved, skills required, entry requirements and related occupations are available.

We also subscribe to a number of online resources where students can access impartial information to help them make informed and realistic career plans. Passwords to access the following resource can be obtained from Mr Sturtivant.

Passportfolio which provides information on many careers, education and training options, employment issues, subjects, higher education courses and also includes CV writing and action planning sections.

### Other Online Careers Resources
